

Belmar Municipal App

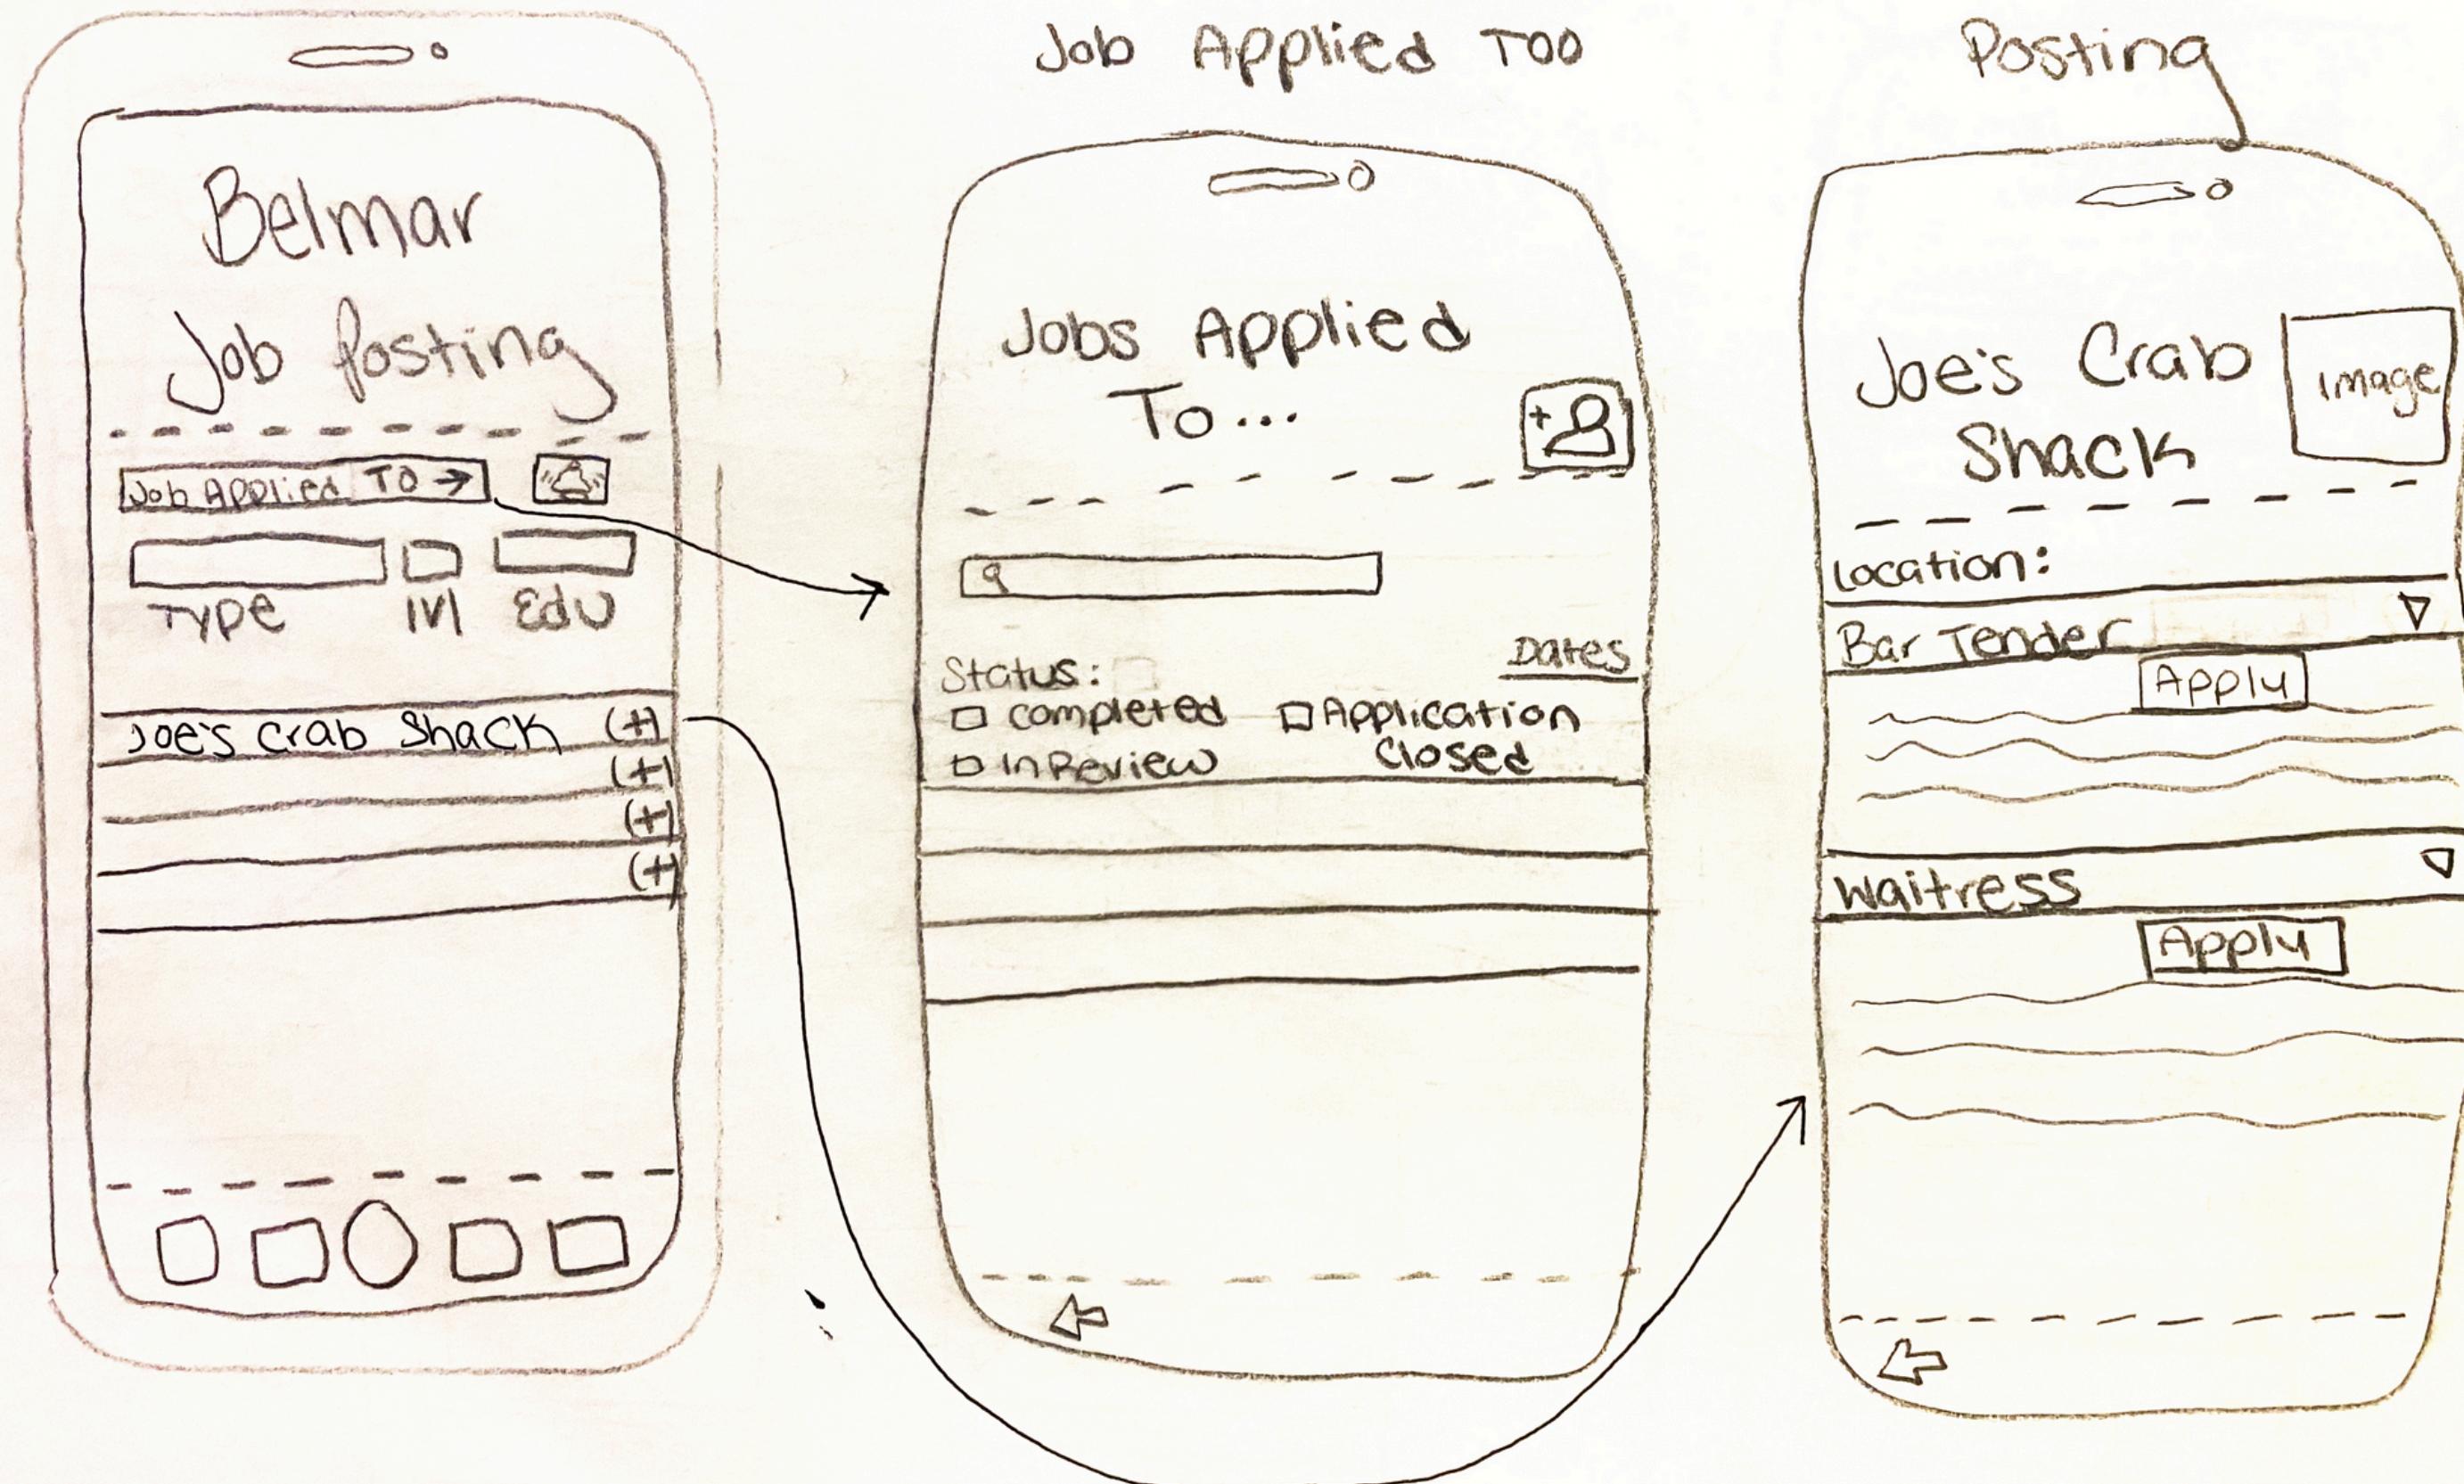

Paper Prototype

The home page is where all the apps are clearly layed out for the user. The footer at the bottom helps hold the information that has gone on while using the app. Including adding calendar info and setting up notifications. This screen is a jumping off point for all tools within the app.

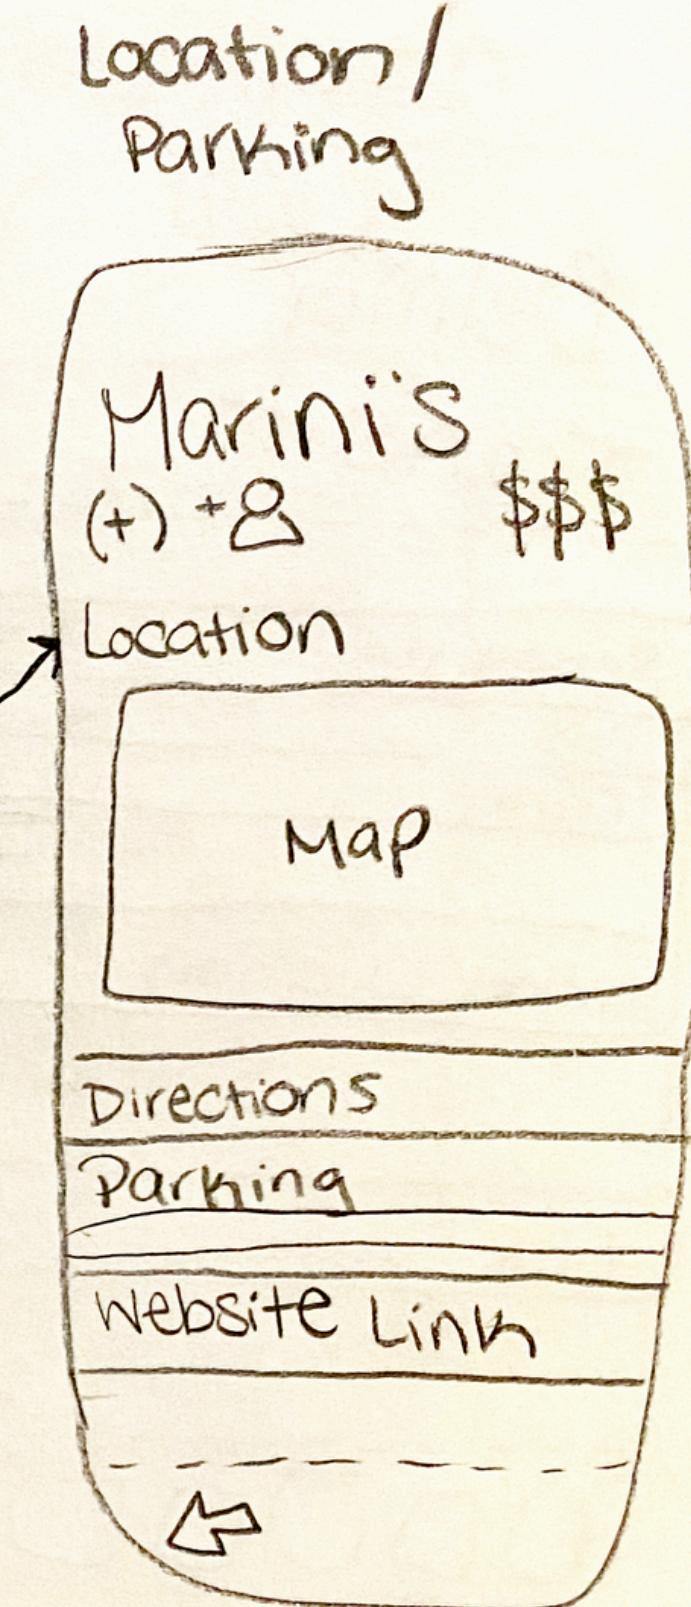

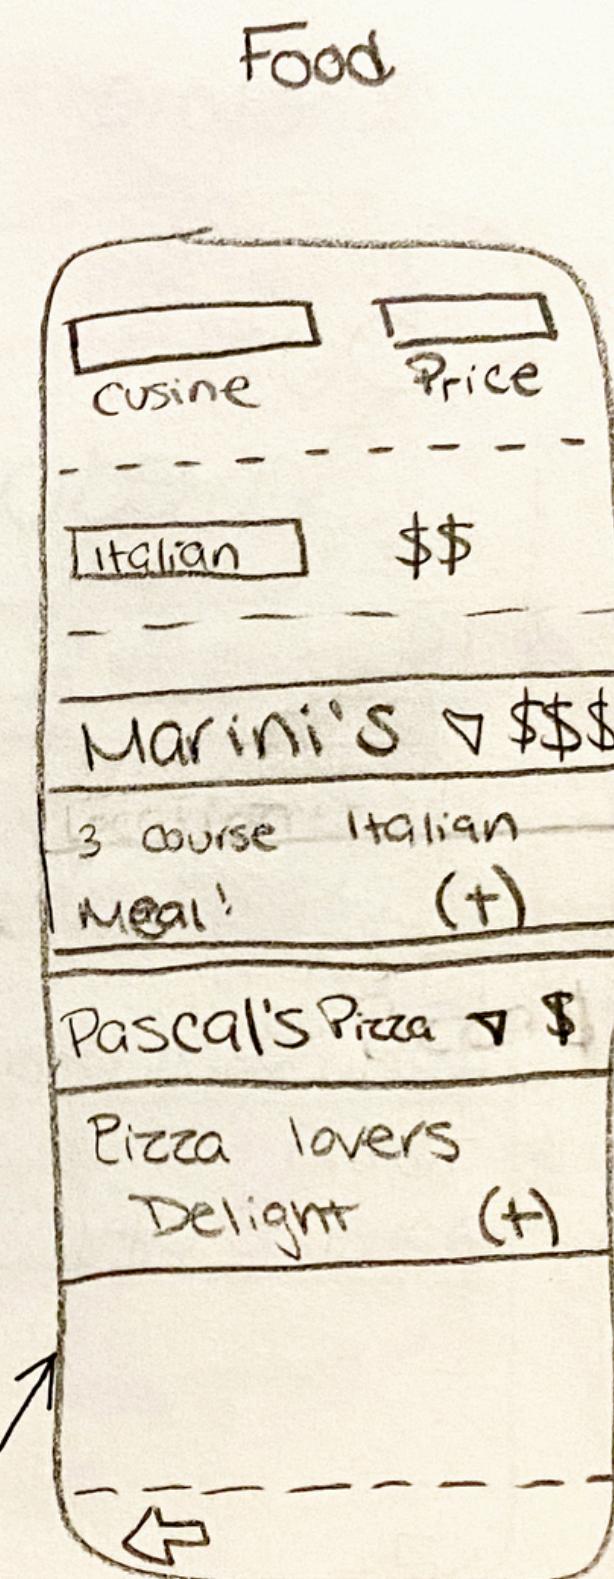

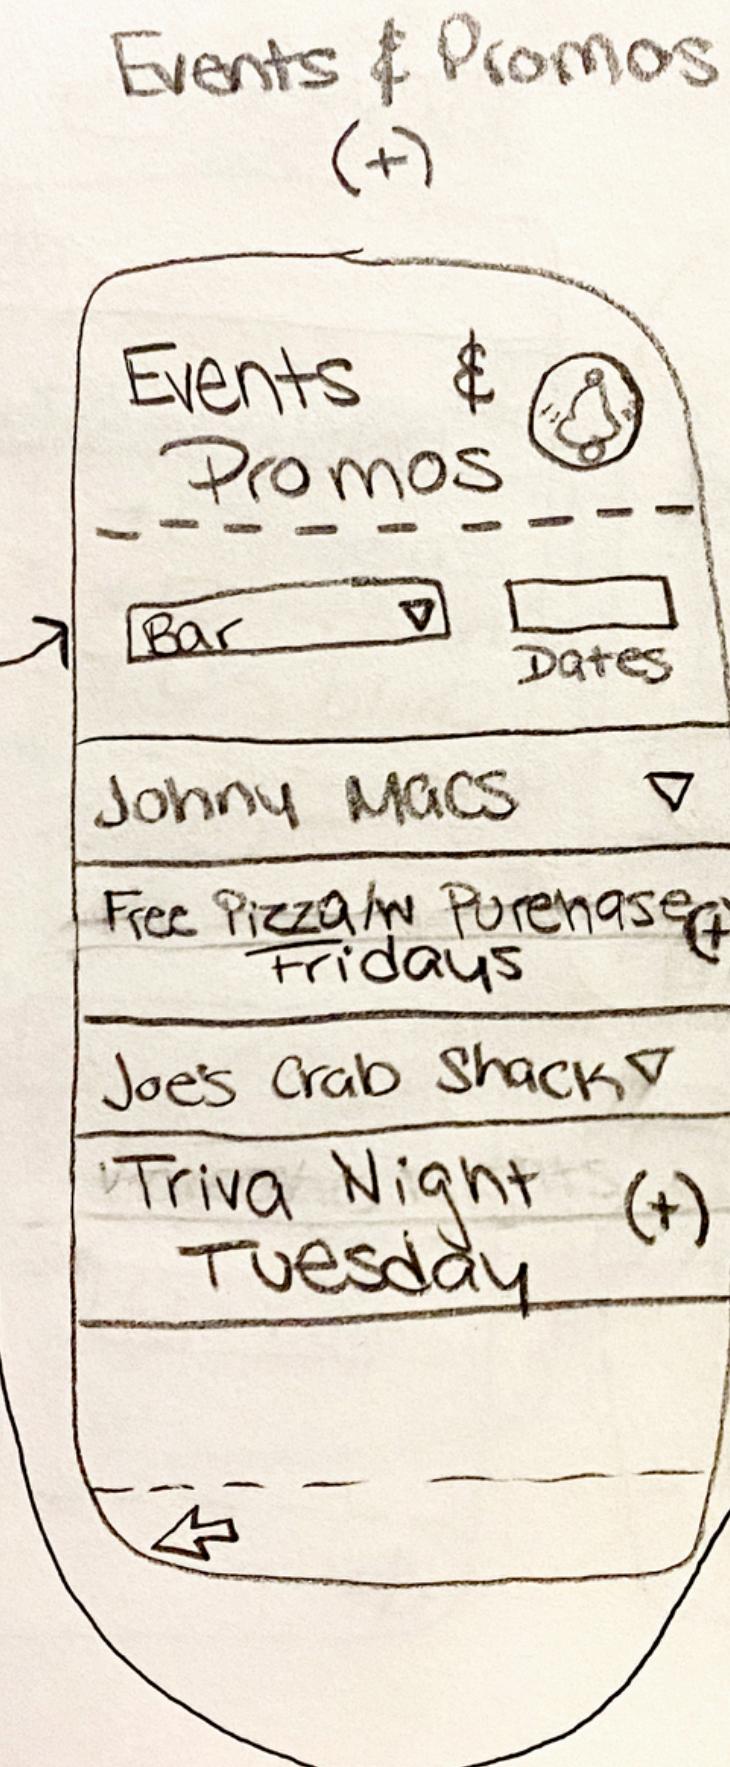

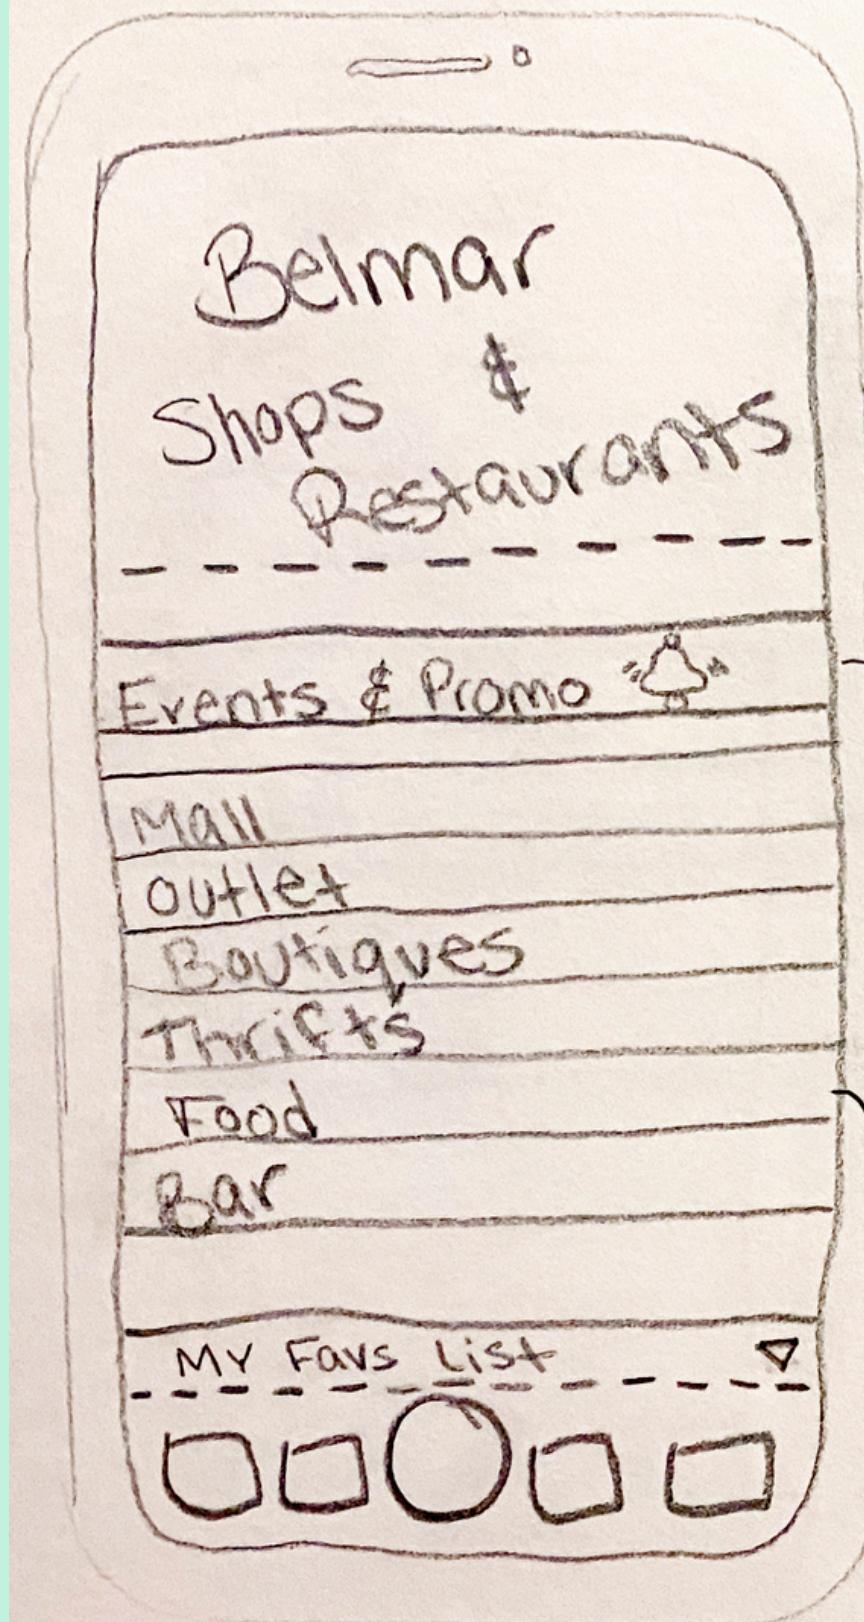

This tab is all about the news in the neighborhood. I really like when things have categories to really be able to find what you are looking for as a user. So I made a channel for traffic reports, fun everyday news, emergency alerts and any community events. The user also has the ability to set up notifications for when any of these news outlets updates. Residents staying updated and current with what is going on around them.

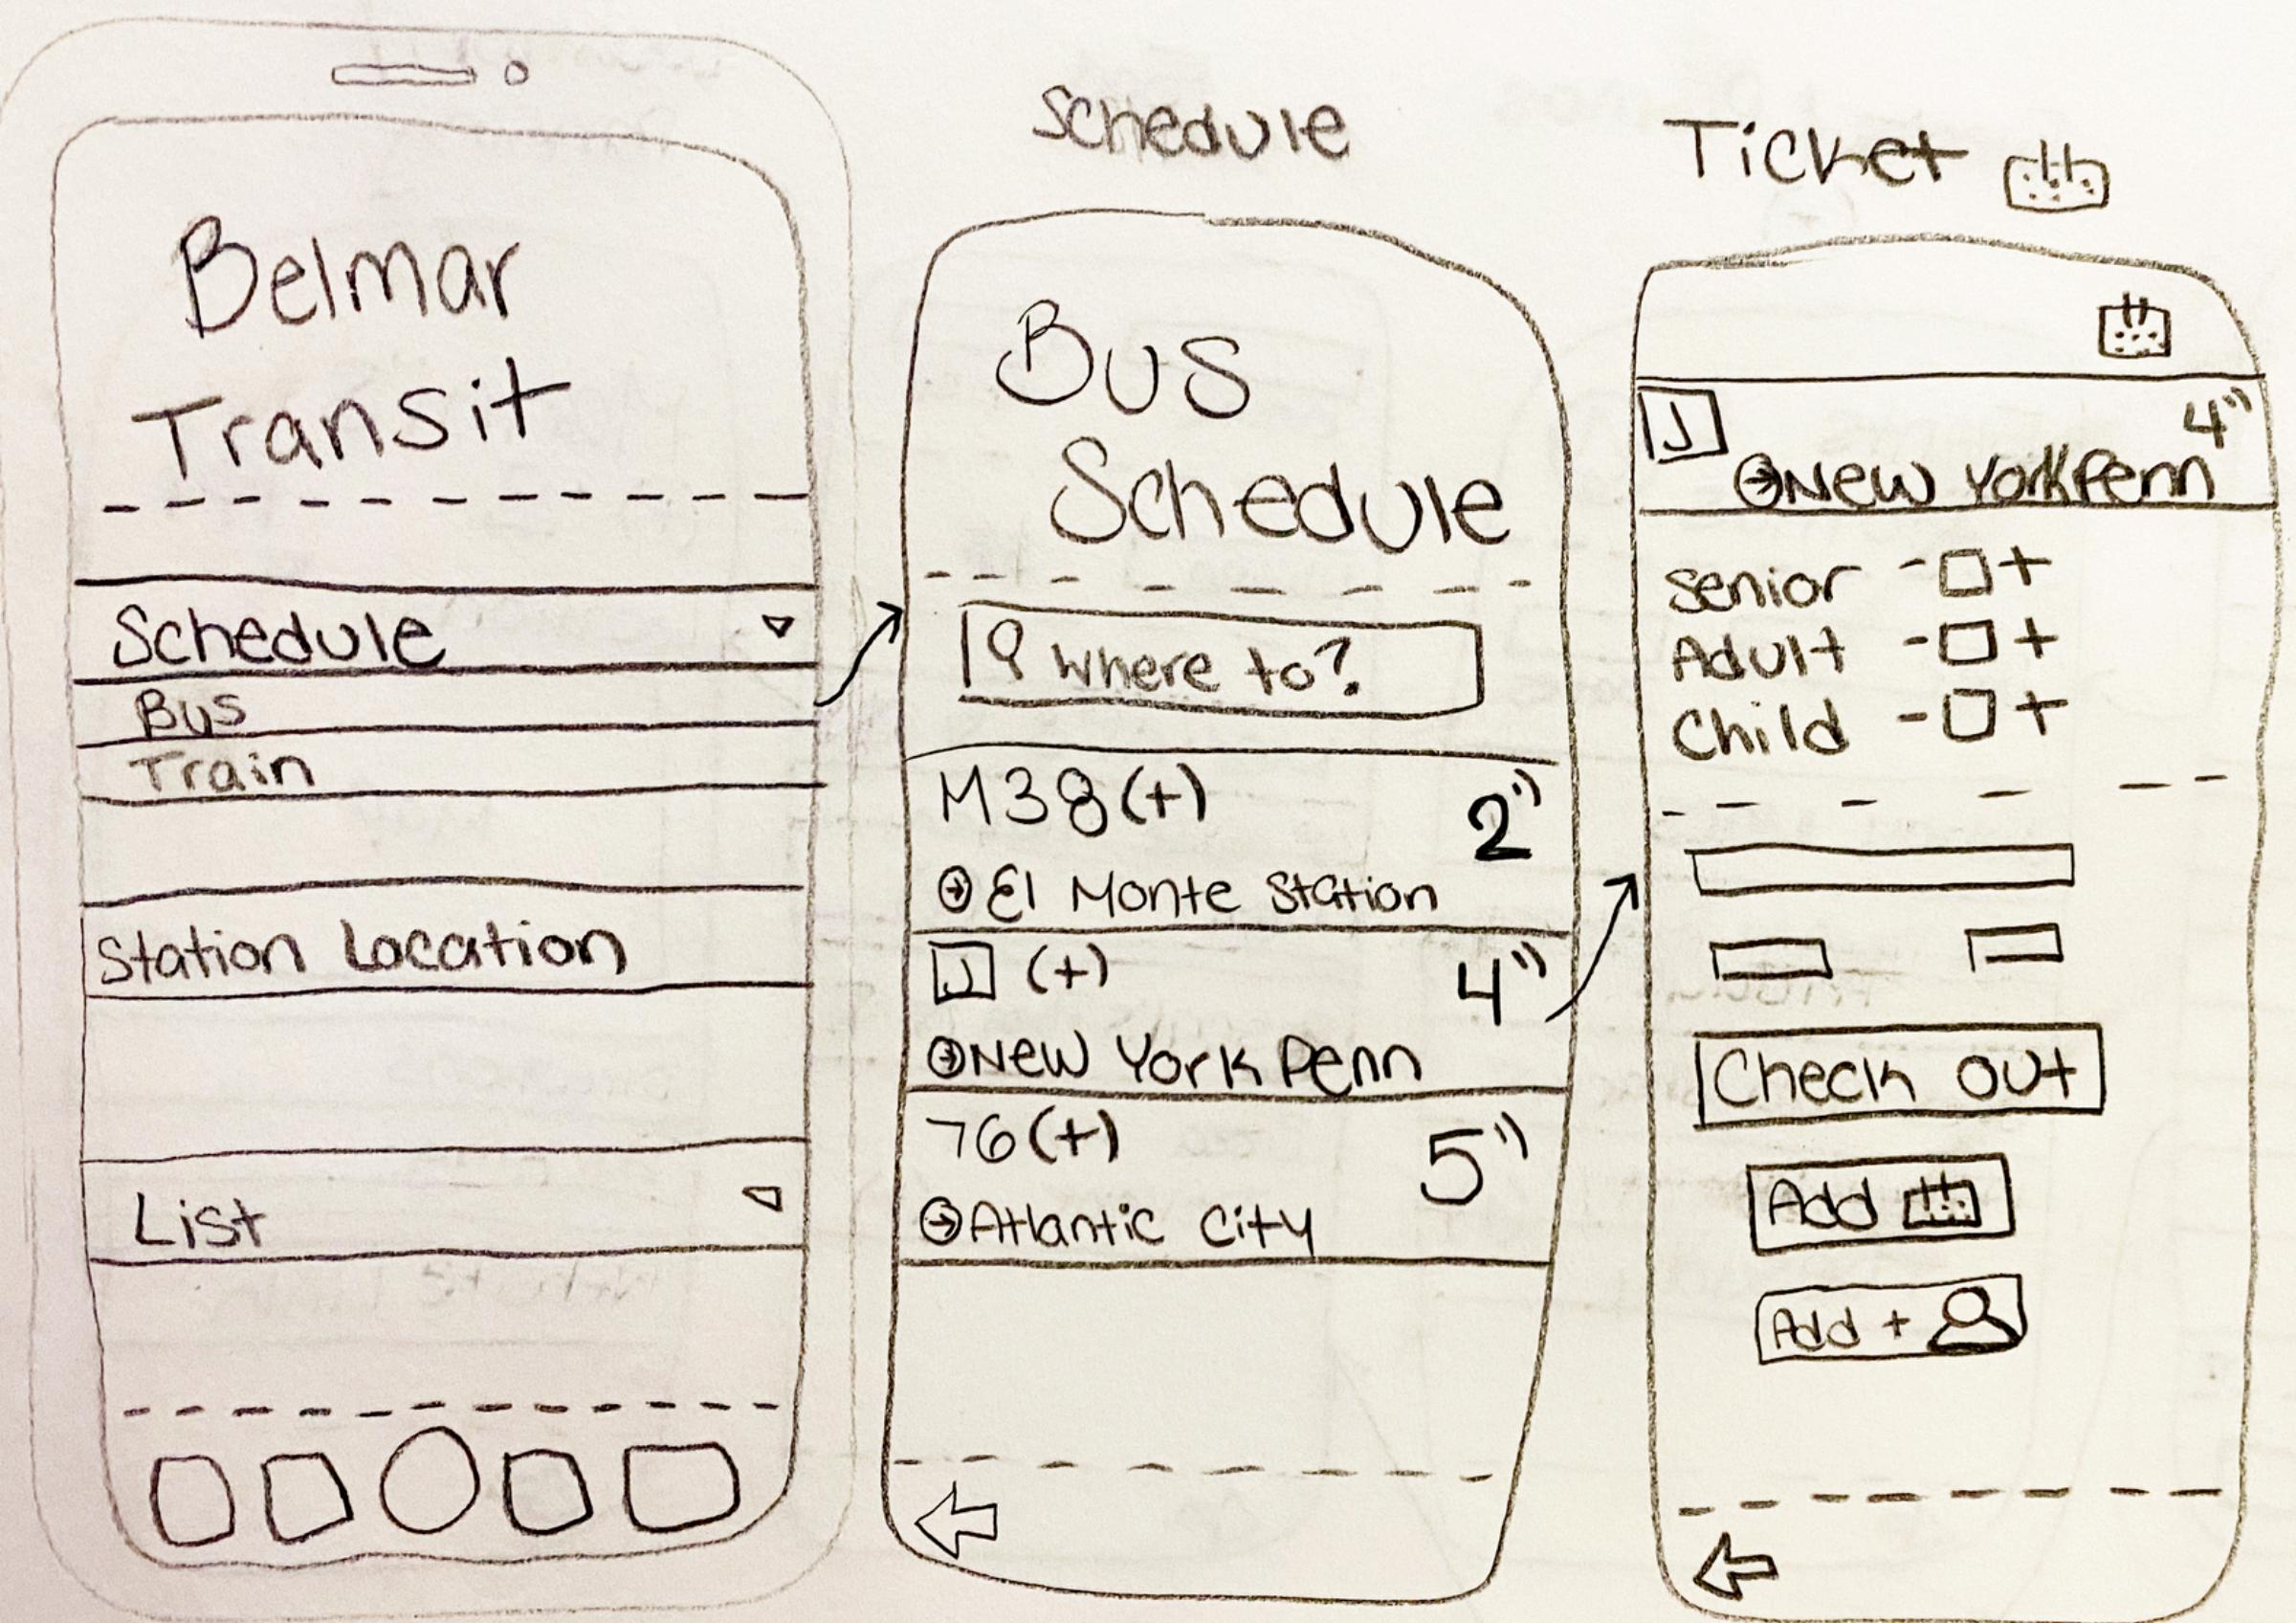

Job Postings is a personal indeed for the local area. For when people are looking to work in their area. This will help apply and track applications so that residents can be financially stables and the community can benefit.

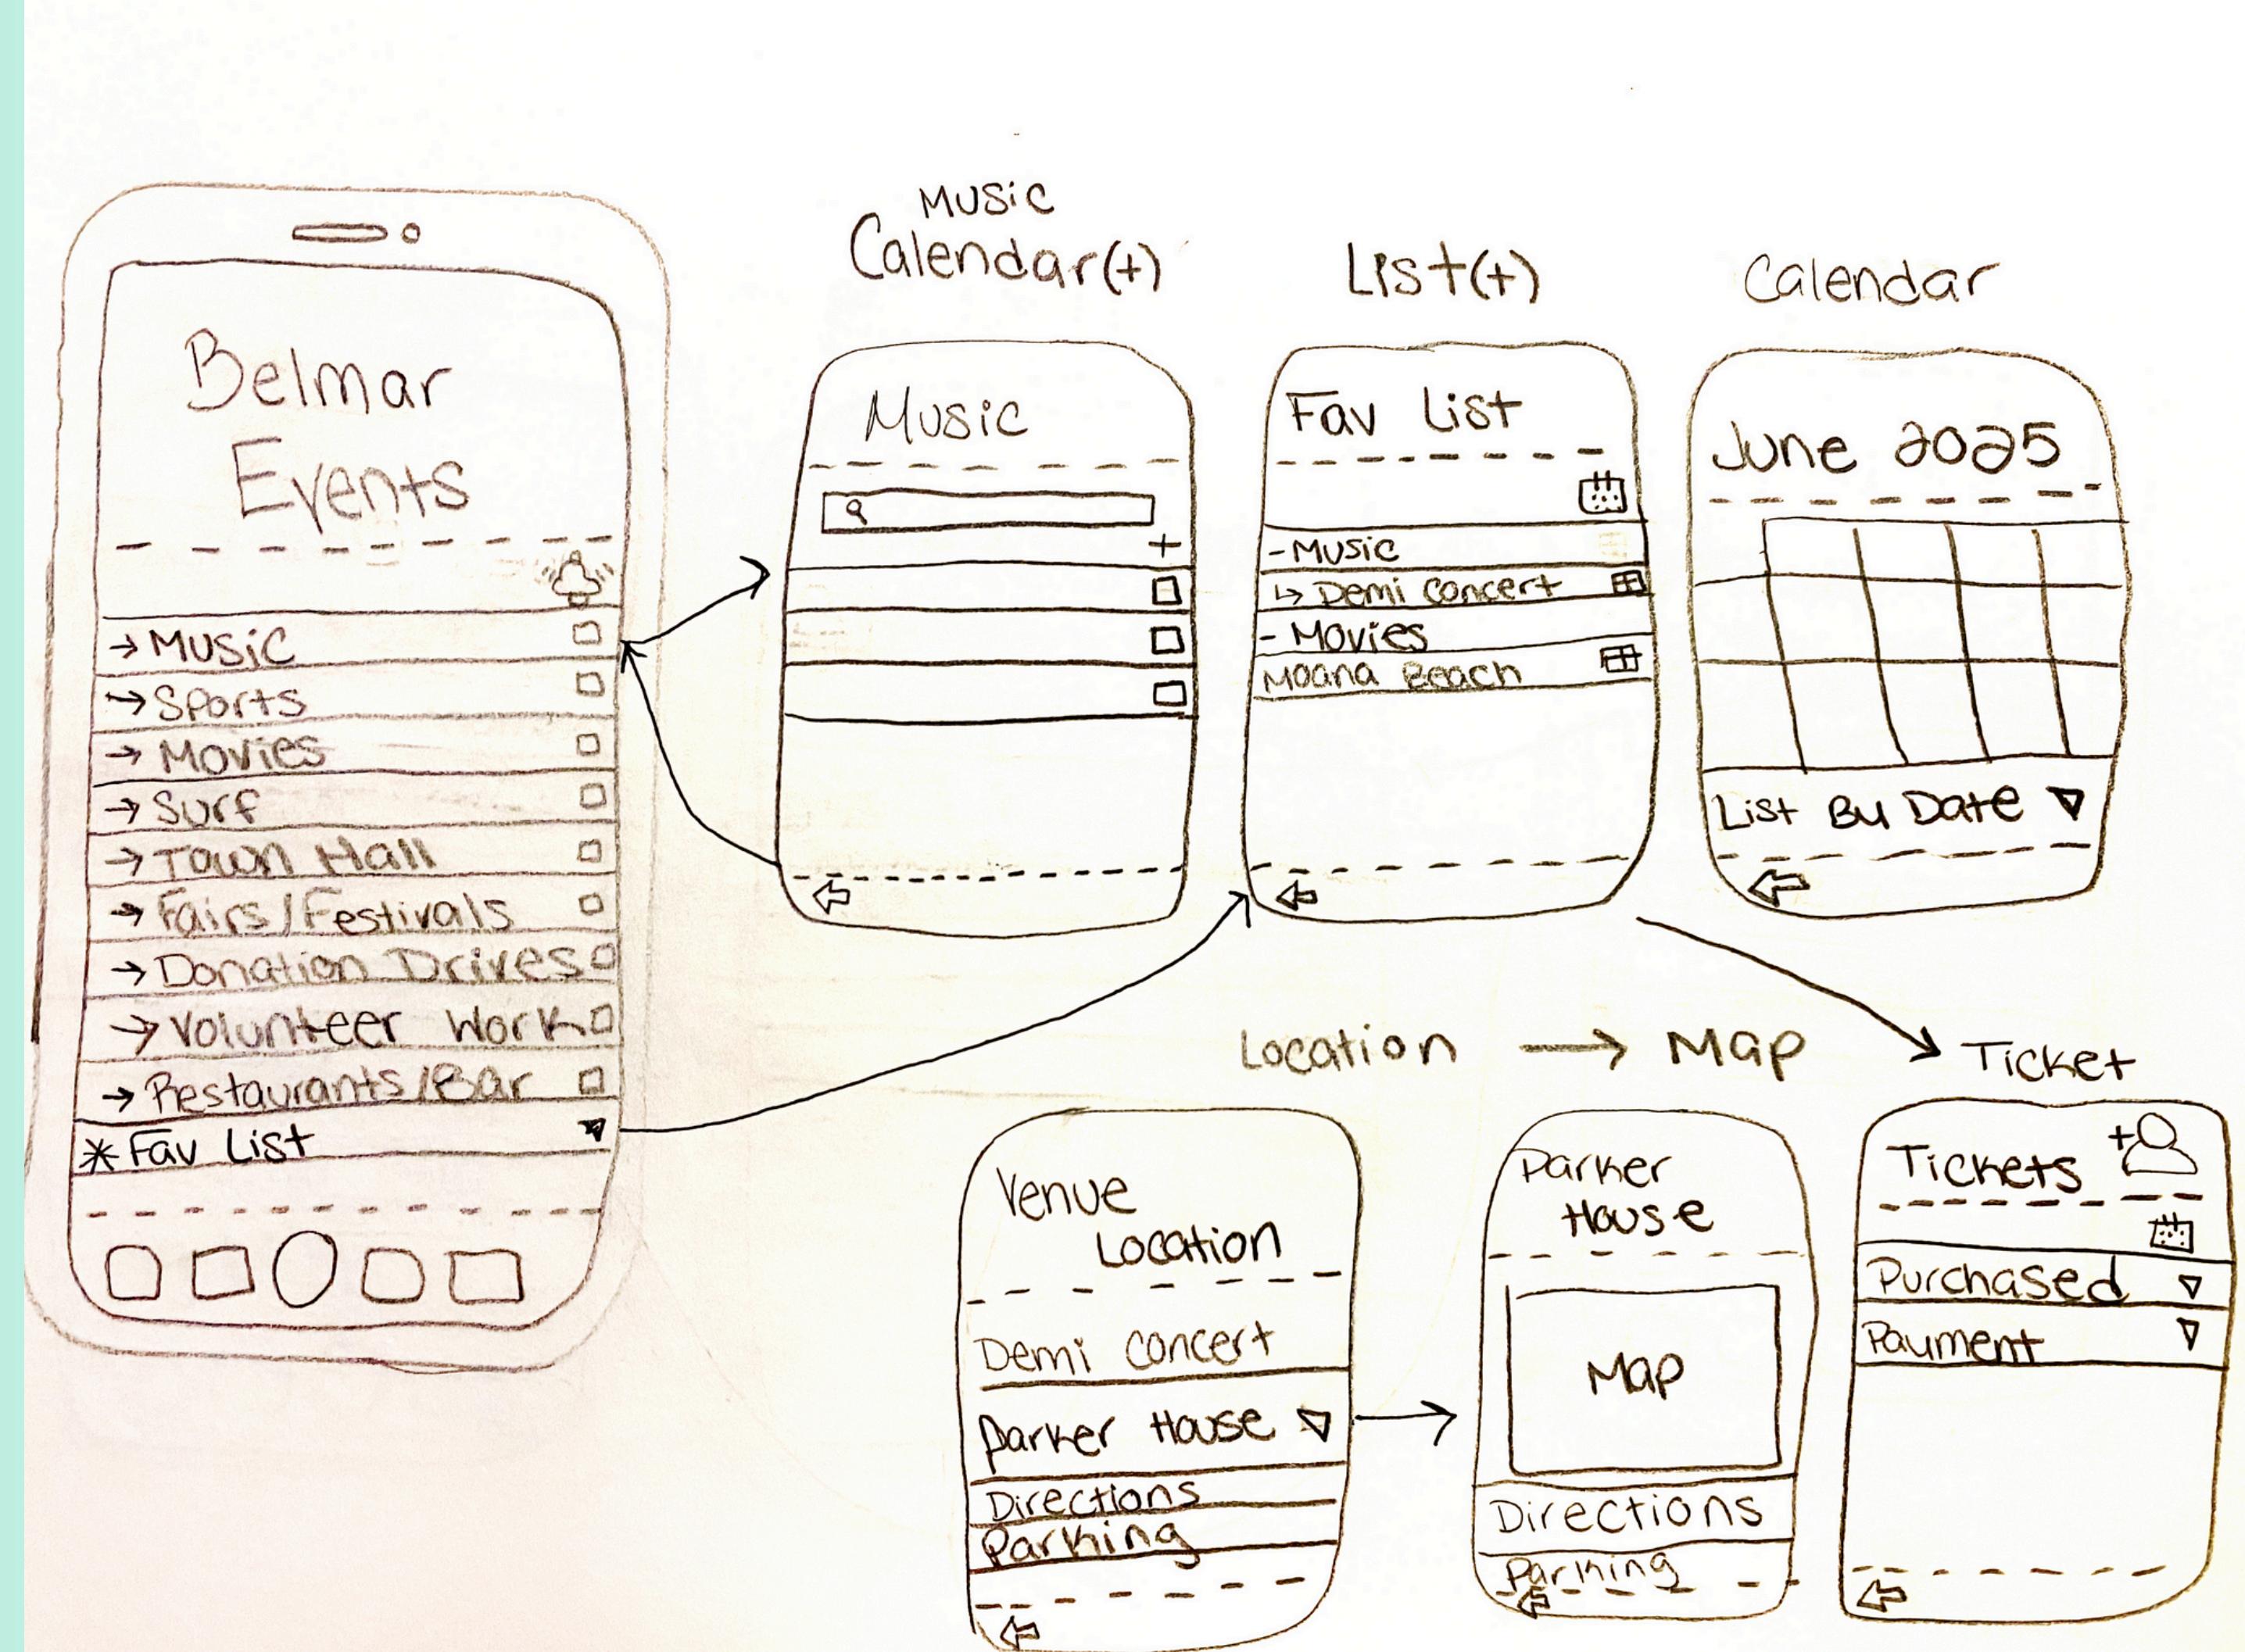

Shops and Restaurants have events and promotions all the time and they need somewhere to promote it for the locals. This is a great spot to find out when happy hour is at Bar A or when the food truck festival is in town. At every step the user has the ability to add to there fav list and set up notifications for future similar events.

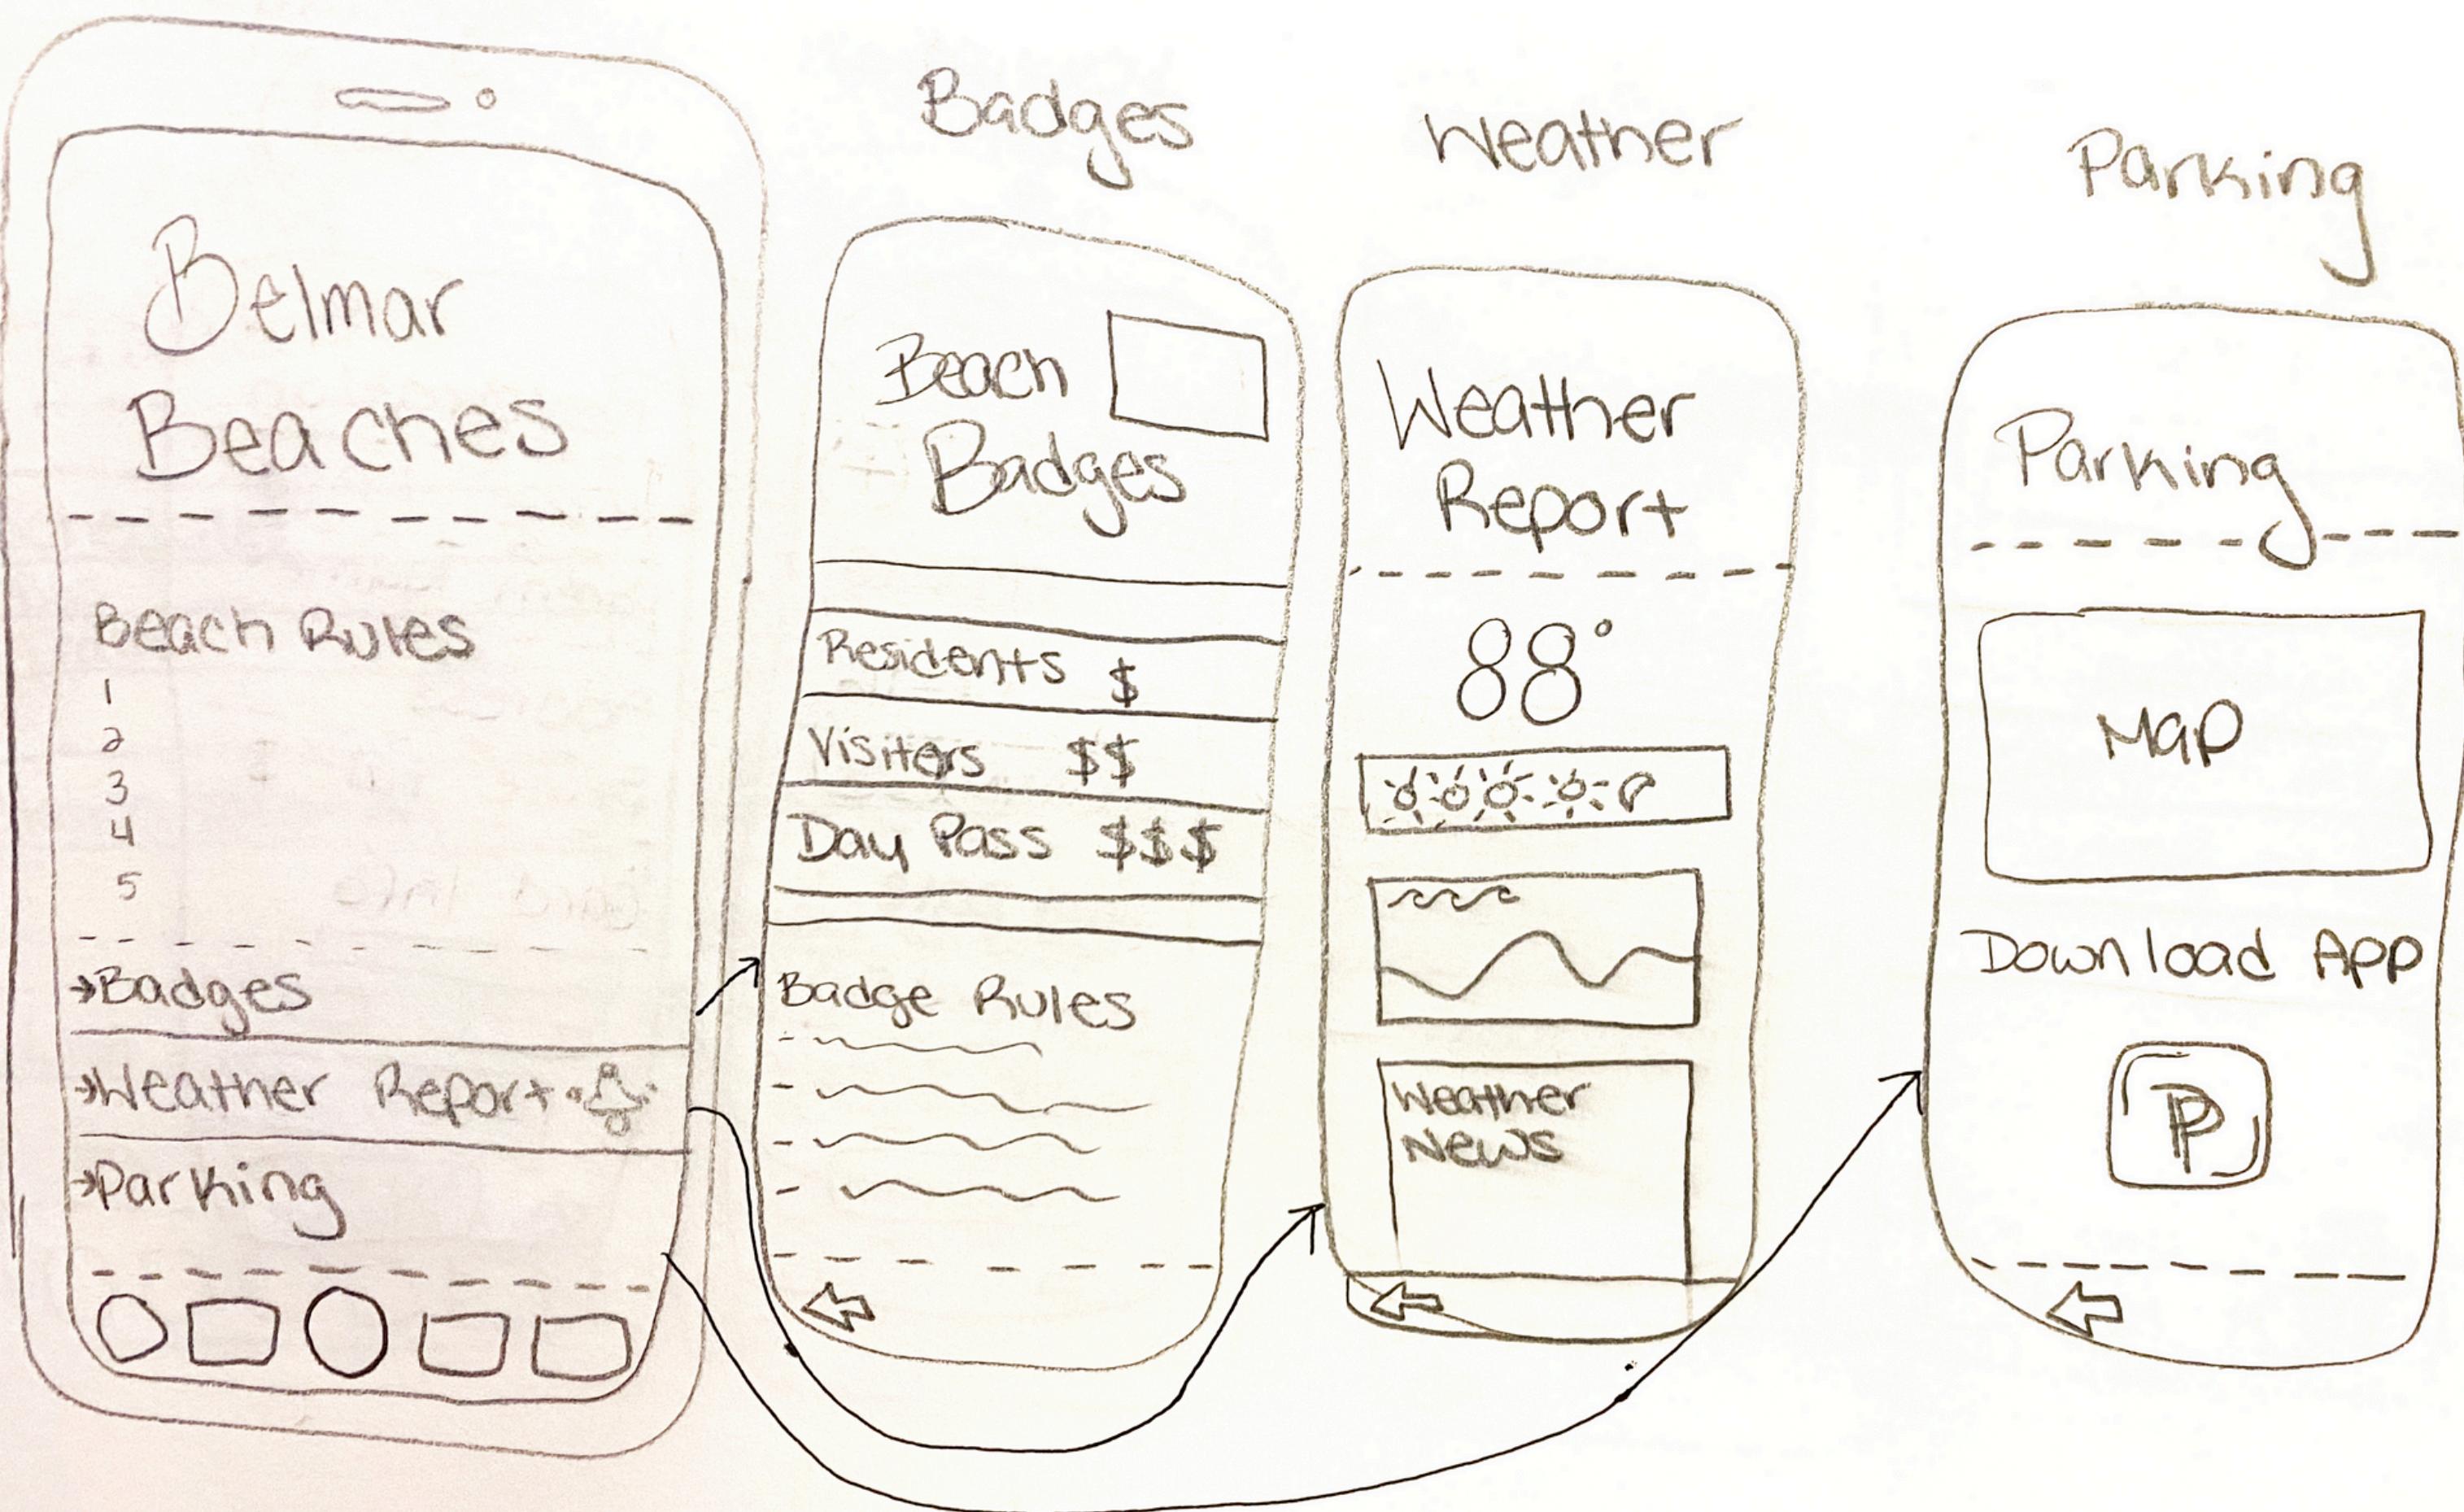

Belmar is a commuter town and it would benefit the locals greatly to know what trains are running on time, where you have to go to catch the train you want and how to buy the ticket. Once the ticket is purchased the user can add to calendar with notifications so that they don't forget.

Events in the area
need for
attendance this is
the place to go.
The local AA
Baseball league
has discounted
tickets and you
want to see Moana
on the beach this
is where to find,
add to your fav list
and buy tickets. It
also give you
directions and
where to park.

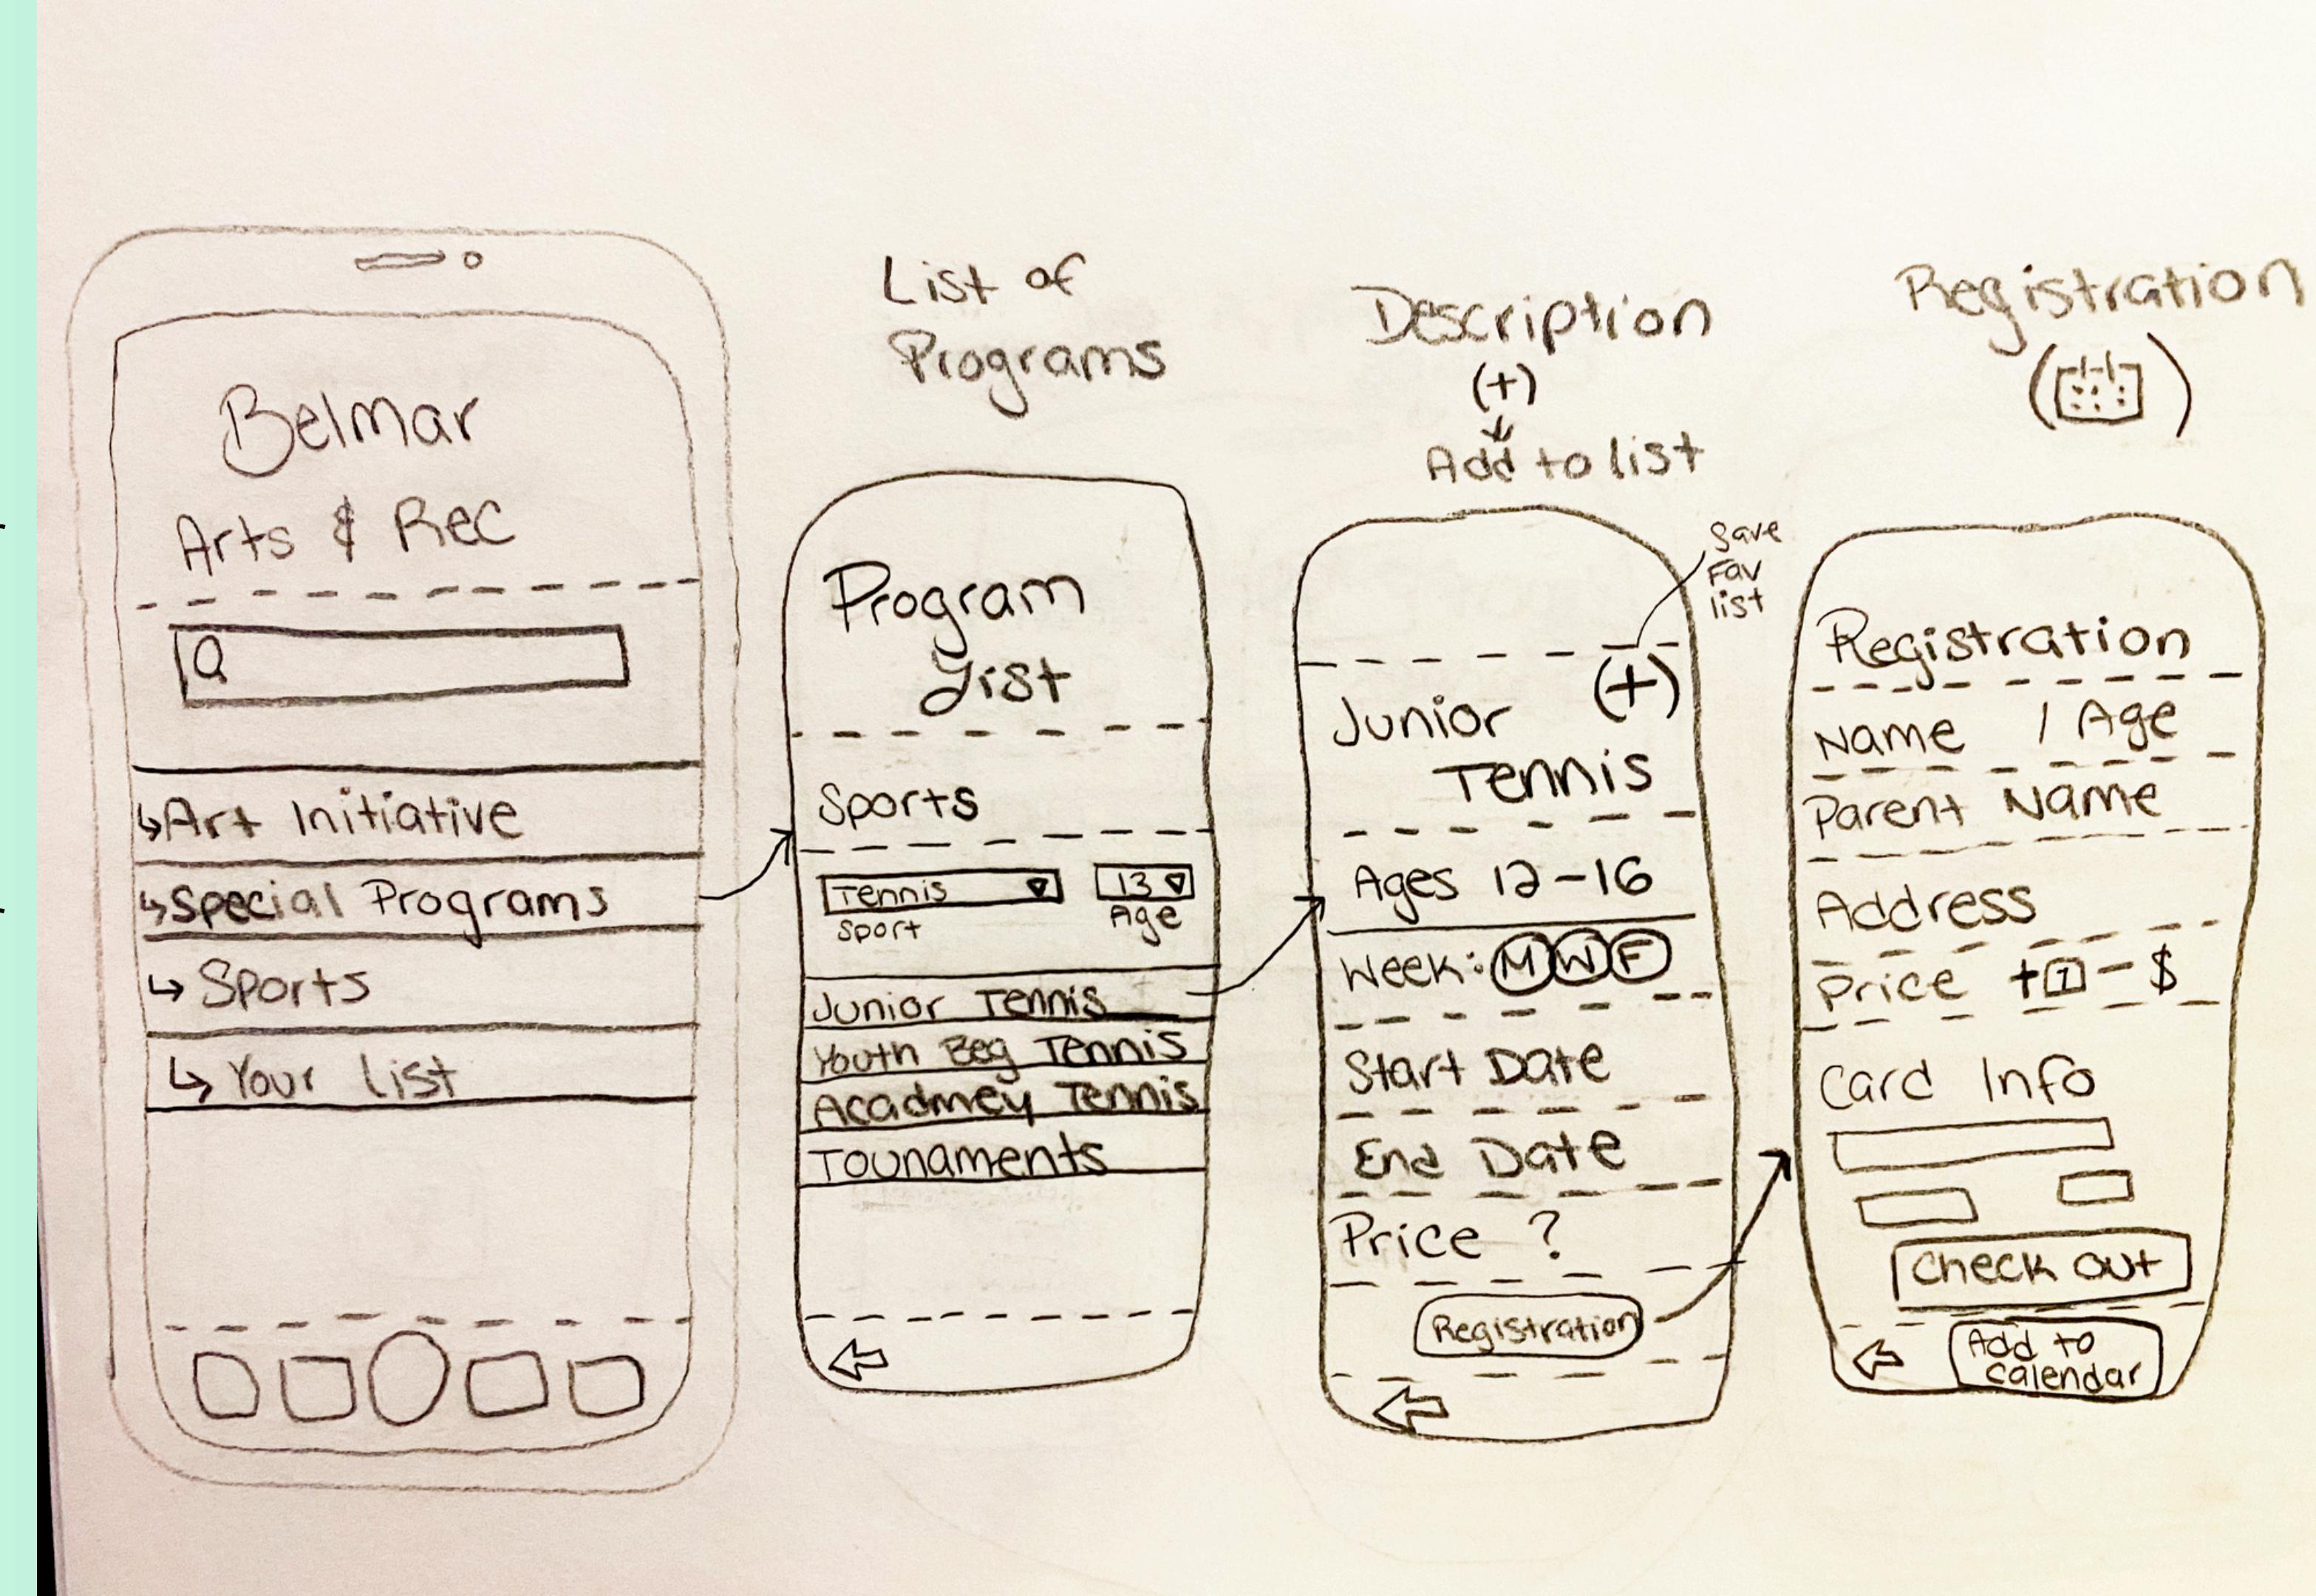

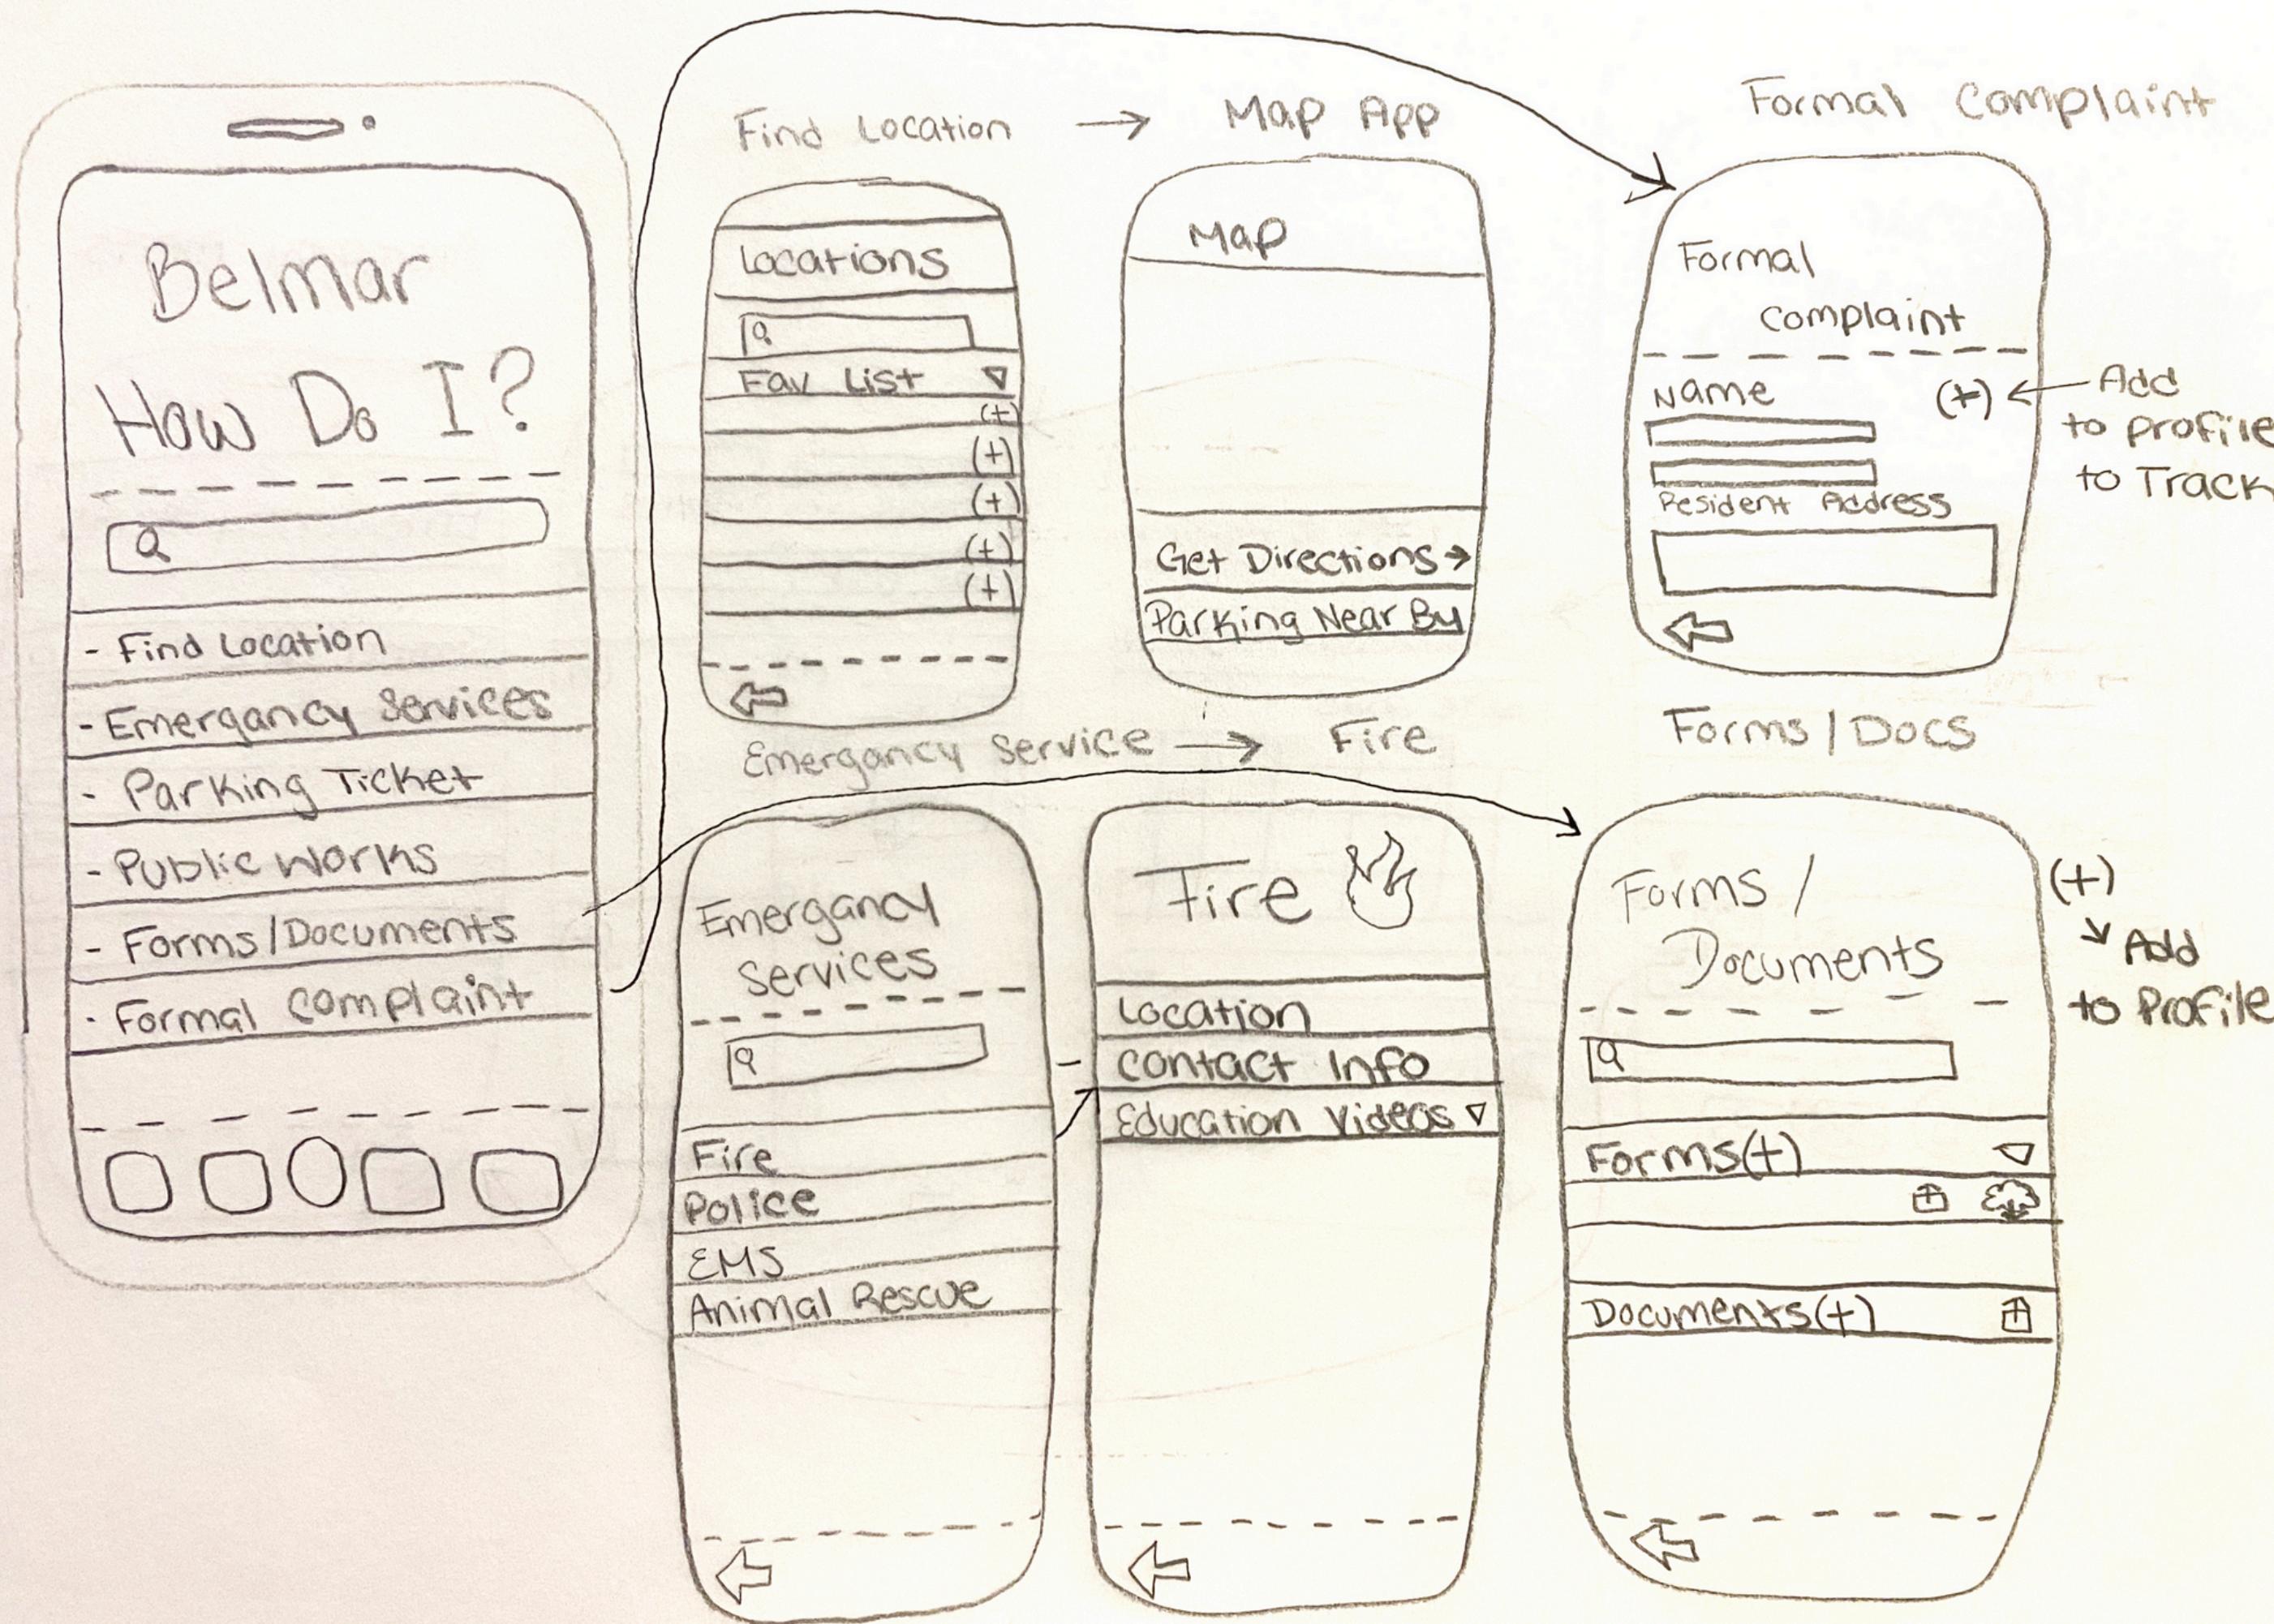

Beaches are a big deal in Belmar, so a one stop to find all the information a user might need is great. This allows your to check the wave report if you are a surfer and to find parking when you know it will be crowded.

This secession is all about arts and recreation activities. If you want to sign up for a senior art class or sign your kid up for baseball this is where you can check out the schedule register and pay for it.

Once that happens you can also add to your calendar and profile so you know what you have paid for .

This section is for people like me who don't always know where to look for something and need a little guidance. I also know older people might get frustrated and this is a good solution.
