- Correct anything Wrong

PROJECT PLANNING

CHLOE LEVY

My overall style of project management is to include everything that needs to be done each week in my life. This includes work and other activities outside of my content creation. My rationale behind this is to stay up to date with everything I need to do and make sure I can do it in the time given. Allowing for nothing to collide.

I currently work a full time job, I'm enrolled in a second class, and trying to balance all that with other just life stuff. If I can get everything down on one page then I will clear my head to focus and get work done.

This is all about understanding limitations. I broke my tasks down into different groups. My other class Capstone Class and the tasks needed for the week. Things outside of school, for example I'm having people flying in from out of state to visit, so my tasks need to be planned around the days that I will be showing people around and potentially doing tasks at night or early in the morning. Understanding when I work best will help alleviate the overall stress of the week

I have a group for the Content Creation Class as a place to understand my overall deliverables for the week plus any meetings I need to attend.

A group for Blogs, breaking down the small detailed steps so I don't forget anything. By that I mean making sure I have reference links in my post and self created images throughout.

I have a group just for the Bibliography because with all those sources I need to make sure my formatting, annotations and anything else is correct.

My last few groups are for Pre-Production, Production, and Post Production, this is overall my weekly routine on getting ready to shoot, shooting the video and editing it all together. That will be added to and changed each week according to each week's video theme and idea.

And the last group is for the following week's assignments. Just in case everything gets finished, this is where I can check last.

<input type="checkbox"/>	+ Add task							

Monday.com

I chose Monday.com after trying out a few different options because for me this flowed the best and made the most sense. I also really love the Status feature, priority feature and the timeline to be know exactly when the due date it. I keeps me honest and consistently checking to make sure I have not missed anything.

All Tasks  	In progress  
46	2

Tasks by status  

To manage the remaining five weeks of the course effectively, I've developed a structured weekly workflow that balances productivity and my well-being. I use Monday.com to organize tasks and deadlines digitally, while also maintaining a handwritten weekly "To Do" list.

Writing things down helps understand clearly what actually has to be done and just visualizes the plan for the week.

Each weekend either Saturday or Sunday, I'll begin pre-production for the week's content by deciding on the theme, writing the scripting, planning the shortlist and gathering necessary materials.

Filming will take place on Monday or Tuesday, depending on availability and preparation. This will be followed by writing the accompanying blog post for the week, which I aim to complete shortly after recording, while the ideas are still fresh. I also want to get ahead of it so that I don't forget or feel overwhelmed later in the week.

To Do:

- Project Research Phase 1
- Project Proposal
- Project Artifacts
- Project Blog Post

- Project Bibliography
- Project Proposal
- Blog Post 1
- Content Mind Map
- Site Map Portfolio

To Do:

- Content Creation Blog
- Sign up for website
- Hand in Homework
- Get Ahead for Next weeks work
- Fix Alex's Schedule
- Clean Apartment
- Drinks with Aubrey & Chase Thur
- Marini family Arrives Sat

To Do:

- Update Bibliography
- Blog 2
- Content Planning
- Final Logo or (2-3 options)
- Brand Board & Color palette
- Blog #1
 - ↳ "Dream Job"
 - ↳ 300-650 words

Chloe Levy 3d

How to Journal:

This will look a bit different for every person and project. Include:

- Readings, viewings, research, artifacts (made, wrote, shot, etc.)
- Time tracking - how long on each task
- Software, hardware, tools, and materials
- Project-specific: interviews, surveys, field trips, etc.

Keep and compile your journal in your software of choice.
If you keep handwritten documentation, sketches, etc., be sure to scan and include that in your weekly journal.

Editing will start Wednesday and likely continue into Thursday, as editing is a more time-consuming area for me. I've built this buffer intentionally to avoid last-minute stress.

Final posting will happen most likely on Friday, giving me a consistent end-of-week deadline with time if anything gets messed up.

Throughout the week, I'll also update any course-related documentation and ensure I stay aligned with weekly objectives and artifacts.

By frontloading preparation on the weekend and spacing out tasks over multiple days, I give myself the room to stay on top of assignments while still having time to decompress and do work for other classes.

This repeatable schedule allows me to put my best foot forward in each task of the process, reduce burnout, and maintain high-quality output. My goal is not just to stay ahead but to create with intention and balance.
